

Production truth — “kitna kaam hua” ka permanent sach

The two tables

WorkerStageTask = WHO was on a stage (participation; cancel-not-delete — roster jhooth nahi bolta). WorkerStageContribution = WHAT they made (color/size/qty lines).

The three quantities (never confuse)

- `reported_quantity` — worker ka claim. IMMUTABLE forever (owner \$6).
- `verified_quantity` — management ki correction (P1 review page). Reported ko kabhi touch nahi karta — dono history mein rehte hain.
- frozen `expected_rate/earning` — complete par freeze hota hai. SIRF visibility (Expected strip); paisa NAHI (ADR-0005 Option B).

Lifecycle

assign → (draft saves allowed) → SUBMIT (lines lock, expected freezes) → stage complete (unreported tasks AUTO-CANCEL — F3; P2 dialog pehle warn karta hai, naam le ke).
Settlement-credited line? verified edit REFUSES — pehle settlement reverse karo (V2-3 armor ka extension).

Why this shape

Pay disputes mein teen sawaal hote hain: worker ne kya bola, factory ne kya maana, paisa kis number pe bana. Teeno alag columns = teeno ka permanent jawab. Single mutable “quantity” hota to har dispute he-said-she-said hota.
