

docs/LEARNING — topic lessons (developer + owner)

Teaching material: not WHAT the code does (code + docstrings say that) but WHY the architecture is shaped this way. Read in numeric order, or jump via [LEARNING_PATH.md](#).

1. [Django concepts used here](#)
2. [Database relationships & how rows look](#)
3. [Transactions & locks](#)
4. [Service-layer architecture](#)
5. [Production truth](#)
6. [Financial truth & the settlement lifecycle](#)
7. [Costing](#)
8. [Adda lifecycle](#)
9. [SQL — beginner to advanced, project-based](#)
10. [Online resources — official links mapped to this project](#)
